Experience

WEBBUGGS: 03-2022 – CURRENT

Jr MERN Stack Developer:

- Continuously updated skills through training courses, workshops, and self-study- staying current on industry trends and emerging technologies.
- Developed a web application using WebRTC and Web Socket technologies for real-time voice communication, with a strong emphasis on security and scalability. Built on Express.js, this ensured seamless real-time interactions and data privacy.
- Build the front-end of an NFT website utilizing React, and work in collaboration with the backend team to seamlessly integrate the code.
- Collaborated with cross-functional teams to ensure seamless integration of new features

Full Stack WordPress Developer:

- Developed custom plugins/modules based on specific requirements provided by clients or stakeholders.
- Migrated existing websites to new hosting platforms with minimal downtime or disruption to the end-user's experience.
- Leadership in Divi Module Development Led the creation of Divi module products, utilizing React and PHP for dynamic and efficient web functionality. Directed teams from concept to launch in an agile environment, emphasizing code quality and system scalability.
- Designed and implemented responsive, user-friendly website interfaces using HTML5, CSS3, and JavaScript, enhancing user experience and accessibility across various devices.
- Regularly communicated project status with clients throughout the development process to ensure alignment between expectations and deliverables.
